Profile

Computer Engineering graduate, research assistant, visual artist and programmer interested in visual storytelling, interactive media, mythology, game design and the relationship between technology and artistic expression. My academic and creative interests focus on how visual forms, narrative structures, and interactive systems shape identity, emotion, agency, and experience. I aim to develop an interdisciplinary practice that brings together art, storytelling, coding and visual communication.

Education

Yildiz Technical University 2017 – 2021
Bachelor of Science in Computer Engineering
GPA: 3.55/4.00
Ranked 3rd in the department; graduated as an honor student.

Burak Bora Anatolian High School 2011 – 2015
Math-Science Program

Academic and Professional Experience

Research Assistant 02/2026 – Present
Fenerbahçe University, Computer Engineering Department, Istanbul

- Work as a research assistant, supporting academic, administrative, and course-related processes.
- Teach and support Web Design courses covering HTML, CSS, and introductory web development concepts.
- Prepare course materials, academic documentation, and departmental reports.

Software Engineer 01/2023 – 05/2024
Beakwise Inc., Istanbul

- Developed backend APIs and frontend features for financial applications.
- Worked with Rust, PostgreSQL, Oracle, Vue.js, TypeScript, Postman, Git, and Docker.
- Gained experience in technical problem-solving, system design, testing, and collaborative software development.

Test Engineer 04/2022 – 01/2023
Hitit Inc., Istanbul

- Developed automated testing scripts using Cypress, TypeScript, and jQuery.
- Implemented Jenkins CI/CD pipelines for test automation and reporting.

Creative and Research-Oriented Projects

Independent Narrative Game Project Ongoing

- Developing a Unity-based narrative game that combines interactive storytelling, visual atmosphere, game design, and character-focused worldbuilding.
- Responsible for game art, character design, coding, game design, and narrative structure.
- Explore themes such as identity, choice, mythology and the emotional role of visual environments.
- Use the project as a bridge between visual art, interactive media and technology.

Research Paper: The Ouroboros of Time Ongoing

- Developing an academic research project on the use of time as a narrative device in visual and interactive media.
- Examine linear, branching, cyclical, and closed-loop models of time in films, games, and narrative-based interactive experiences.

- Focus on player empowerment, identity, fate, choice and narrative structure.
- The project emerged from questions developed during the creation of an independent narrative game.

Game Jam Project

Project-Based

- Participated in game jams and collaborated with a four-person team, including people I had not previously known.
- Contributed to rapid prototyping, code, 2D art, visual direction, game design under time constraints.
- Gained experience in collaborative creative production and interdisciplinary teamwork.

Research and Creative Interests

Visual storytelling; visual communication design; character design; mythology and symbolism in art; interactive media; game design; narrative design; identity and agency in games; digital art; traditional painting; visual culture; human emotion in visual representation; art and technology.

Skills

Web and Technical Skills: HTML, CSS, JavaScript, TypeScript, Git, Docker, SQL

Interactive Media: Unity, C#, Game Design, Narrative Design, Interactive Storytelling

Art and Design: Drawing, Painting, Digital Art, Character Design, Visual Storytelling, Concept Development

Creative Tools: Photoshop, Canva

Academic Skills: Literature Review, Academic Writing, Course Material Preparation, Teaching Support

Languages

Turkish: Native

English: Fluent

IELTS Academic: Reading 9/9, Listening 8.5/9, Speaking 7/9, Writing 7/9, Total 8/9

YDS 86/100

Selected Interests

Visual Arts, Visual Communication Design, Painting, Illustration, Mythology, Interactive Storytelling, Problem Solving, Programming, Philosophy, Psychology, Character Design, Digital Media.
